Workers waste time looking for information

Know how is only available in the head of few people

Knowledge sharing often means giving up power

High turnover exacerbates the issue

Increased cost of **repeating errors** that could be avoided if previous experience was taken into account

Graasp supports knowledge management for development NGOs

Collaboration

dia features

Contextual analytics

Graasp's target scenarios range from Personal Learning Environment with Open Educational Resources to Knowledge Management with social media features and **contextual analytics**.

Public good level

<image>

Participatory design and decision making through **non-profit association** and interdisciplinary teams

For open access for **cross organisation** collaboration

A **public good** is a good that can be consumed by one individual without reducing the potential amount available for others. Knowledge is an example of such a good.

Open Research Challenges

How can Big Data help improve knowledge **Transfer?**

Summary

Knowledge management is crucial for NGOs, yet knowledge management is hard.

The Graasp.net project aims to support e-learning activities and knowledge management in NGOs up to the highest public good level.

Big data analytics will allow to further foster adoption by helping to understand scenarios and culture and provide incentives
